DIRECTIONS FOR USE

SPRAY APPLICATION

Insects	Rate	Application
Sheep Ked	Mix 200 mL with 50 L water in a sprayer.	Spray until entire animal is thoroughly covered. Do not exceed a maximum of 150 mL of spray solution per animal. One application per year. Treatment is in fall or winter before lambing and shearing. Do not treat sick animals. Do not contaminate feed or watering areas. Do not apply to lambs or sheep within 90 days of slaughter.

Compendium of Veterinary Products

Please read all labels carefully and in full, before using any veterinary product. Free access to label information is available from the *Compendium of Veterinary Products* at <http://csf.naccvp.com> (there is a link from www.ablamb.ca).

Many parasiticides are pesticides not drugs. Instead of a DIN (drug identification number), these products have a PCP (pest control product) number. **It is illegal to use a PCP product in an extra-label manner, even by veterinary prescription.**
